

ECONOMIC PROMOTION

The UPVD supports researchers in their attempts to enter into partnerships with the socio-economic world, promoting their research through its Research and Promotion Department. The UPVD aspires to drive economic development and dynamism across the region.

The purpose of the Research and Promotion Department is to help the parties involved enter into Research contracts. The Research and Promotion department is a one-stop service for all Research associated with a contract or an agreement. Any researcher with a contract proposal should therefore contact this department exclusively before doing taking any other action. It will provide them with the advice they need for entering into negotiations.

The Research and Promotion department is part of the national [C.U.R.I.E. network](#) that groups together all bodies in France involved in academic promotion.

The UPVD is a shareholder in [AxLR](#), a technology transfer acceleration company.

ITS MISSIONS

- Facilitate joint projects with the socio-economic world
- Support the creation and monitoring of joint projects (FUI, Horizon 2020, ANR, etc.)
- Establish relations among university and industrial partners
- Support the creation of innovative companies
- Manage intellectual property

KEY INFORMATION

- €2 million of research contracts per year
- 40 new joint research projects per year
- support provided for several new companies each year
