

QUALITY RESEARCH BONUS

2018 QUALITY RESEARCH BONUS CAMPAIGN

The “BQR” – the quality research bonus – is a fund for financing research projects within the UPVD. It is mainly used as a means of getting research into emerging high-risk topics off the ground, but can also be used to co-fund seminars and conferences. Often, once the BQR has been used to initiate projects, they get funding from national ANR-type or European programmes as part of consortia made up of several academic and industrial partners. The BQR is managed in a cross-category, multidisciplinary way. Every year, grant recipients are selected by a single panel made up of all of the laboratory directors and outside experts covering the whole range of disciplines concerned.

The list of BQR projects below only includes those that are currently receiving funding.

- IHPE - Olivier REY - Développement de marqueurs génomiques et étude des populations naturelles de schistosome hybride au Sénégal.
- BAE-LBBM - Lise BARTHELMEBS - HppdBiomark : les gènes hppd microbiens comme biomarqueurs des herbicides -tricétones.
- PROMES - Maxime PERIER-MUZET - Procédés thermochimiques innovants couplant stockage thermique et production d'électricité : caractérisation du cycle moteur en conditions représentatives de couplage dynamique.
- CEFREM - Philippe LENFANT - Acquisition de recycleurs (système respiratoire à circuit fermé) pour la plongée scientifique.
- HNHP - Anne-Sophie LARTIGOT CAMPIN - Comportements des Prédateurs au Pléistocène.
- LGDP - Thierry LAGRANGE - Identification des ARN messagers cibles d'une nouvelle famille de protéines impliquée dans le développement et la réponse des plantes à leur environnement.
- LEPSA - Fabienne DURAND - Hypoxie simulée et recherches au LEPSA.
